## MANAGEMENT DISCUSSION AND ANALYSIS

### 1. Industrial Scenario:

Presently India, China, Korea, Taiwan and Indonesia are the main producers for the Dyestuffs and Pigments. The manufacturers of Europe and USA have almost shifted the production base to these Asian Countries. The main reason for this is the low cost of production and ample manpower within Asian Countries.

Dyestuff Industry mainly depends on the Textile Industry and in fiscal 2013-14, Textile Ministry is confident to achieve the export target of USD 55 Billion inspite of slowdown of demand and presently most of the Asian Countries are encouraging their textile business which used to be their core business once upon a time. Lots of incentives have been provided to the textile industries in India and other countries and presently all these textiles are being exported to Europe, USA and other Western Countries. So, definitely with the improved textile industry, Dyestuff Industry is bound to grow.

Dyestuff Industry has gone into a tremendous change during last ten years as manufacturing activities in European countries have been stopped due to the environmental and pollution problems. Today, the global market of dyestuffs, pigments and intermediates is around USD 40 Billion with dyestuffs and pigments market is approximately around USD 27.50 Billion and the intermediates is about USD 17.50 Billion. India's share in the global market is about 9 to 9.5%.

African Continent with a population of 1 Billion is growing at a fairly good growth (Say 8% P.A.) and India's Trade with Africa has reached nearly \$49.5 billion. We are tapping this market by deputing our Technical cum marketing team frequently to increase our market share.

Today India is the second largest producer of Dyestuff after China. Though the Chinese products are very cheap and economical, Indian products are always preferred because of the consistent quality and timely delivery. To this effect now in China also the cost of production is increasing and hence the price difference between Indian products and the Chinese products has reduced. So, definitely in the very near future the price difference between Indian products and the Chinese products will no longer exist.

### China –to lose competitive advantage:

The biggest competition for our industry is from China. Presently Chinese pigments manufacturers are more economical because of economies of large scale. But following table will explain why China is going to lose its competitive advantage vis a vis India:-

Country	China	India
Subsidies	Chinese Govt. is gradually reducing the subsidies granted.	In India, for exports no subsidies exist. Duty drawback is only incentive available to exporters which works out to just 1% and even if withdrawn will have insignificant impact.
Energy Cost	Energy cost which was almost zero earlier, is now becoming expensive.	Energy cost in India is at peak now. Govt. of India is taking number of initiatives to generate and supply uninterrupted power without further increase in cost.
Labour Cost	Labour is getting more expensive in China	Labour is still very cost effective. Besides normal 10% to 12% increase p.a. there is no further addition to cost.
Stringent pollution control norms	Earlier there were no specific norms to follow. But, nowadays every factory in China has to fulfill certain basic norms to be pollution control.	In India, in general and specifically in the states of Maharashtra and Gujarat, where there is concentration of Chemical Industries, there are already strict requirements in relation to follow. In many industrial areas common effluent treatment plants have come up where effluent treatment is done at very nominal cost. Hence, no threat from Pollution Control norms.

Apart from these, if you are exporter manufacturer than the charges like Excise, Sales Tax does not form part of Cost of Sales. With the GST rollout in sight, further simplification of tax laws is expected.

Considering all the above factors in coming 2 to 3 years, Chinese prices of pigments will be at par with that of Indian manufacturers of pigments. Indian manufacturers have got a great opportunity on hand to capture the market presently controlled by Chinese, the process of which has already started. Two years back, it was almost impossible to export organic pigments out of India but slowly and steadily Indian organic pigments manufacturer have started creating market for their own products worldwide.

**Domestic demand push:**

Indian GDP is expected to grow @ less than 6.25% for the fiscal 2014-2015. Indian government is planning to spend more than Rs. 1 trillion on infrastructure development in next 10 years. Therefore, there is a growth in all infrastructural related industries. New roads are being laid out, huge townships have been planned and constructed across India in 4 metros as well as tier 2 and other medium size cities. Demand for plastic is increasing day by day, Textile Industries are doing better, Indian exports of textiles especially home furnishing to Europe and USA are increasing. With all these end-user industries doing well, demand for pigments is going to increase manifold in the years to come. As a result, there is wide scope for growth of pigment in ink industry in India.

**2. Outlook:**

In view of the above circumstances, it is expected that the Dyestuff Industry will continue to grow once conditions improve.

**3. Risk factors and threats:**

Risk involved in economics and working of industries are greatly influenced by the various policies fabricated by the Central and State Governments. If the policies of any nature are framed with utmost transparencies and in frequent intervals, coupled with a definite all time performance on the part of management, growth and development of industries is certain. Flexibility on the managerial behavior with flexibility on the needs of the customers is also taken as an important factor.

**4. Utilization of the Products:**

It is always dangerous if the products manufactured by the Company utilized only by a specific industry. In view of this, the management always tries to have multiple products having end use in multiple industries. Accordingly, the products manufactured by the Company have been utilized successfully in the following industries:

**a) Textile Dyeing and Printing:**

As mentioned above, with a growing textile industry, the management is sure to have substantial growth by utilization of the concerned products within the textile industry.

**b) Paint and Printing Ink:**

The Company is producing Pigments since last four years. Pigments are utilized widely for Paint and Printing Ink industries. With the increase of application related to printing such as Media, Newspapers, etc., there are huge possibilities for the sales of this product within the Printing Ink Industry and with the growing infrastructure, construction, automobile industry; the Paint Industry & Rubber Industry is also doing well, wherein the Company is selling its products. Pigment Dispersions have found good scope for Textile Printing and Coating Industry.

**5. Opportunities:**

In recent times, we have increased the Customer Base. Besides exporting to develop countries, such as USA, EEC, JAPAN, we are exporting even to the remote places like Guatemala, Uruguay, and Vietnam.
